

## DIY PAINTED CANDY CORN MASON JARS

### Supplies:

3 (1 quart) size mason jars  
3 bottles of chalk paint (white, orange & yellow)  
foam paint brushes  
twine  
painter's tape  
paper plates  
ruler

### Steps:

1. First, determine how you want the three lines to go on your jar and mark where you will be wrapping the painter's tape to separate the bottom line (yellow) from the the first top line (white).

2. Then, apply the first coat of yellow, and allow to dry before applying the second coat.

3. Once the yellow paint is completely dry, add tape to the next section (orange). Repeat step 2.

4. Repeat the process on Step 2 to paint the top section (white).

5. When the jars are thoroughly dry, take your twine and wrap it around the part just below the rim of the jar, about 3 times or just enough to make a nice bow.

\*Note: Remember to apply 2 coats of paint for each color, and let each section to dry completely before working on the next section of color.
